

## Power Pivot Winches provide automated in-boarding

In-boarding your boat for hull and prop maintenance or safety under adverse weather conditions has always been an important feature of Davit Master Seawall Mount Boat Davits with their reliable, smooth turning pivot bases. The power Pivot brings convenience and an extra measure of safety to in-boarding your boat.

Power Pivot -concrete base

Power Pivot – 6500# Davit

- Available for Davit Models B-1000 through B-8000 installed in concrete behind a seawall. May be installed on new, existing or other brands of seawall mounted davits.
- Comes complete with a weather resistant, momentary switch and GFCI protected power cord. Available 110V or 22pV AC.
- Enclosed motor is protected from the elements.
- Custom bases and mounting support brackets available.
- An optional wireless remote control system simplifies the in-boarding process.

### IN-BOARDING YOUR BOAT IS A SIMPLE MATTER WITH THE POWER PIVOT

1. Unlock both davits and actuate the Power Pivot.
2. As stern davit moves in, bow davit will follow, moving toward the centerline of the boat.
3. When bow davit reaches centerline of boat, stop motor. Give bow davit a hand assist past centerline.
4. Star motor in reverse position to complete operation. When boat is completely in-boarded, stop motor and lock both davit arms.
