

BOAT DAVITS

- **5 MODELS.** Available in capacities from 600 to 8,000 lbs. with your choice of manual, electric and power pivot.
- **A PERFECT SOLUTION.** Davits work where other lift designs can't: shallow water locations, narrow restricted locations, rock bottoms, and locations where pilings are not permitted.
- **QUALITY DESIGN.** Since 1977, our rugged box beam design has proven superior in all conditions and environments. Our Davits are hot dipped galvanized protected after fabrication for long life and dependability.
- **PROTECTION.** Storing your boat on a davit keeps the bottom clean, eliminates the need for bottom paint, protects from damage caused by wakes and storms, keeps outboards and out-drives in better working condition, reduces maintenance costs and protects your boat's value and improves your boating experience!

DAVIT MODELS AND SPECIFICATIONS

MODEL	STANDARD FEATURES		OPTIONS				
	CAPACITY ONE (pounds)	CAPACITY PAIR (pounds)	WINCH	REACH	HEIGHT	CABLE	CABLE RIGGING

MOUNT TO A SEAWALL OR PILINGS

Seawall Mount

Seawall Mounts - All davit models may be mounted on a seawall.

Pile Mounts - Models P 600 through B 4000 may be mounted on pilings. Pile mount is not recommended for boats heavier than 4,000 pounds.

Pile Mount

Dock Mount Davits for PWC's and Skiffs

Davit Master does not recommend boats heavier than 1,000 pounds for a dock mount application.

DAVIT WINCHES

DIRECT DRIVE WINCHES

- 3 models: DE-30 (3000 lb. cap.) DE-40 (4000 lb. Cap.) DE-50 (5000 lb. cap.)
- Each winch is gear driven for strong, smooth, and quiet operation
- Stainless steel motors for longer life and low maintenance
- Comes complete with a weather-resistant, momentary reversing switch and GFCI power cord.

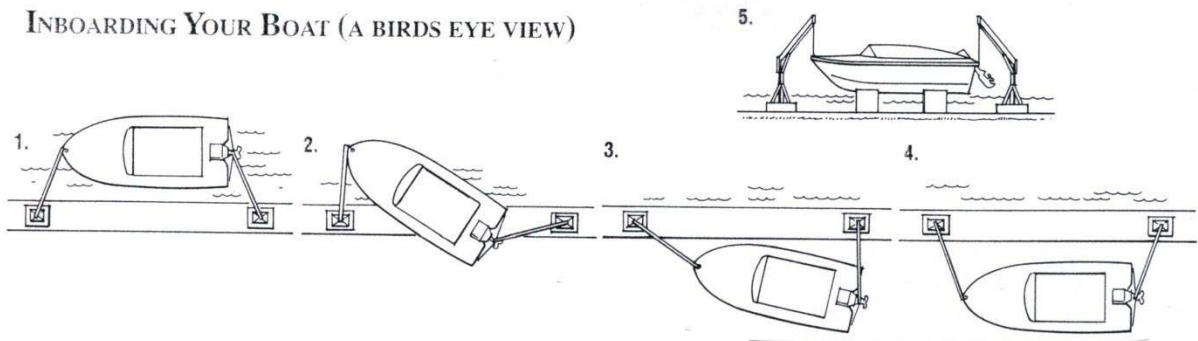

BELT DRIVE WINCHES

- Proven 50 year industry history
- Economical and simple to maintain
- Available for Models: P-600 and B-1850.
- Each winch includes a 6" gear powered by an AO Smith motor on a 1/4" powder coated steel plate with plastic cover
- Includes weather tight switch and 110V GFCI power cord.

POWER PIVOT WINCHES PROVIDE *AUTOMATED IN-BOARDING*

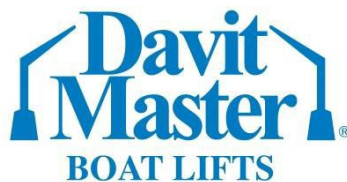

In-boarding your boat for maintenance or safety in adverse conditions has always been a benefit of our Seawall Mount Davits. The Power Pivot brings an extra measure of safety and convenience to the in-boarding process.

Available for Models B 1850 through B 10,000 (must be symmetrical base) that are installed in concrete. The Power Pivot may be installed on new, existing or other brands of seawall mount davits, and is usually installed on the stern davit (must be symmetrical base).

IN-BOARDING YOUR BOAT IS A SIMPLE MATTER WITH THE POWER PIVOT

1. Unlock both davits and actuate the Power Pivot.
2. As stern davit moves in, bow davit will follow, moving toward the centerline of the boat.
3. When bow davit reaches centerline of boat, stop motor. Give bow davit a hand assist past centerline.
4. Start motor and complete operation.
5. When boat is completely in-boarded, stop motor and lock both davit arms.
